August 2014 - May 2015

- Coursework in Business

Skills

Languages:	Javascript, Ruby, HTML, CSS/SASS, SQL
Tools & Platforms:	Git, Heroku, Webpack, MySQL, Postgresql
Libraries & Frameworks:	React.js, Ruby on Rails

Projects

Odinbook | github.com/rueeasy/odinbook

- Created a replica Facebook website utilizing MVC design patterns on Ruby on Rails.
- Implemented polymorphic relationships between user objects with active record associations.
- Integrated sign-in with Facebook functionality using Facebook API, Omniauth, and Devise.

Chess Game | github.com/rueeasy/chess

- Utilized object oriented programming to create, modularize, and instantiate classes with Ruby.
- Implemented data structures and search algorithms to traverse chessboard for validating moves.
- Integrated YAML serialization to save/load games.

Where's Waldo Game | github.com/rueeasy/where-is-waldo

- Built a photo tagging application using a React/Ruby on Rails/Postgresql tech stack.
- Implemented a database to import and store JSON character data for validation.
- Built REST API's to respond to front end calls for verifying photo coordinates and posting player scores.

Employment

Amazon

Independent FBA Seller

New York, NY

Feb 2018 - March 2020

- Analyzed sales metrics to create high converting product listings using Amazon Seller Central Platform.
- Lowered recurring freight costs by 20% coordinating shipments using U.S. based freight forwarders.

Wells Fargo

Personal Banker

Aptos, CA

December 2016 - February 2018

- Provided financial counseling, assisted with lending services, and built client relationships.
- Worked with management to train tellers, maintain 98% satisfaction score, and increase sales production.
